Acquisition	Ownership	Company cars	Purchase	Infrastructure
AUSTRIA				
VAT deduction and exemption for zero-emission passenger and combination cars used for business purposes (eg BEVs and FCEVs). VAT deduction applies according to gross purchase value (including 20% VAT and pollution tax): • ≤ €40,000: full VAT deduction • €40,000-80,000: VAT deduction for the first €40,000 • > €80,000: no VAT deduction	Exemption from the pollution tax for zero-emission passenger and combination cars.	Exemption from the pollution tax for zero-emission passenger and combination cars. A tax investment incentive for the purchase of a zero-emission car amounting to 15% of the purchase price, and a special depreciation applies: 22% from 1 November 2025 to 31 December 2026. For employees, the private use of a zero-emission company car, and the electricity to charge it, are exempt from taxation as benefit in kind.	Incentives are granted by provinces and communities. More details: www.umweltfoerderung.at.	Bonus for the purchase of the following loading infrastructure (private use): • €400 for an intelligent loading cable • €400 for a wallbox (in a single-/double-family home) • €800 for a wallbox (in a housing complex as single equipment) • €1,500 for a wallbox (in a housing complex as integrated equipment with load management) Additional incentives are granted by provinces and communities. More details: www.umweltfoerderung.at.

BELGIUM				
Brussels and Flanders: minimum tax rate (€61.50) for BEVs and FCEVs. Wallonia: low tax rates for low power (≤ 110kW), light weight BEVs and FCEVs (about €50–100).	Minimum tax rate in all regions for BEVs and FCEVs (€102.96). 6% VAT (instead of 21%) for residential electricity consumption.	Tax benefits in all regions for BEVs and FCEVs also apply to company cars. Maximum deductibility (100%) of expenses for BEVs and FCEVs. PHEVs: maximum car cost deductibility (100%) if CO2 ≤ 50g/km and 75% if CO2 ≤ 75g/km as from Euro 6e-bis. 100% electricity cost deduction; 0% for fuel costs. Minimal annual benefit in kind for BEVs, FCEVs, and PHEVs ≤ 50g/km (pre-Euro6e-bis) and ≤ 75g/km (Euro 6e-bis): 4% of the list value.	✕	Brussels city exempts companies from the parking tax if a parking spot is equipped with a charging point. Charging installation at company premises is 100% deductible.
BULGARIA				
Exemption for electric vehicles.	Exemption for electric vehicles.	✕	✕	✕
CROATIA				
No excise duties for electric vehicles.	BEVs: • Reduced road motor vehicle tax fees upon first registration. • Exemption from special environmental tax.	✕	Incentive scheme (up to €9,000) for the acquisition of BEVs for: • taxi service providers; • delivery vehicle users; • vehicle sharing providers. The vehicle must be kept for five years.	In 2026, the construction of charging stations will be co-financed by EU and national funds (NPOO), with growing private investments and strict obligations set by the AFIR regulation.
CYPRUS				
The annual registration tax is calculated based on CO2 emissions. BEVs are exempt.	The annual road tax is calculated based on CO2 emissions. BEVs are exempt.	✕	Grants to buy BEVs for private use: • Up to €9,000 for a new or used car • Up to €20,000 for a new car for a disabled person or a large family The car price, including VAT, should be ≤ €80,000; €35,000 for a used car. More details: Plan for the promotion of electromobility in Cyprus.	✕

CZECHIA				
✕	Reduced levy: • BEVs: 0.25% until end of 2028 • PHEVs: 0.5% Vehicles with a special "EL" number plate may have various benefits (eg free/ cheaper parking, etc). BEVs, PHEVs, and FCEVs are exempt from road tax. Road toll: • BEVs exempt • PHEVs emitting ≤ 50g CO2/km pay 25% Accelerated depreciation for BEVs and FCEVs until 2028.	BEVs, FCEVs, and PHEVs are exempt from registration charges. Tax reduction from 1 to 0.25% for BEVs, and 0.5% for PHEVs also used for private purposes.	✕	Reduced depreciation period for charging stations from 10 to five years (wallboxes and standalone charging stations). Support from the Ministry of Transport for the development of charging and hydrogen refuelling infrastructure for BEVs and FCEVs.
DENMARK				
Zero-emission vehicles (BEVs and FCEVs): • Pay 40% of the registration tax • Additional DKK 161,300 registration tax deduction Low-emission vehicles (PHEVs and EREVs emitting < 50g CO2/km): • 68% of the registration tax • Additional DKK 43,000 registration tax deduction	Ownership taxes are based on CO2 emissions. Zero-emission cars and cars with CO2 emissions of maximum 58g/km pay the minimum semi-annual tax rate of DKK 460.	The value of a charging stand/outlet provided together with the company car (at the employee's residence) is not taxed.	✕	✕
ESTONIA				
BEVs: basic amount of €150 + €2/kg for vehicles exceeding 2,400kg (up to €2,200). PHEVs: basic amount of €150 + €2/kg for vehicles exceeding 2,200kg (up to €2,000).	BEVs: basic amount of €50 + €0.40/kg for vehicles exceeding 2,400kg (up to €440). PHEVs: basic amount of €50 + €0.40/kg for vehicles exceeding 2,200kg (up to €400).	✕	✕	✕
FINLAND				
Zero-emission cars have been exempted from registration taxes since October 2021.	✕	Tax deduction of €170 per month from taxable value (income tax) for BEVs (2021-2029).	Scrapping scheme (2026-2027): • Cars of > 10 years old • €2,500 for a new BEV or • €2,000 for a new vehicle emitting 1-140g CO2/km	✕

FRANCE				
Since May 2025, Regions can provide an exemption on registration tax (either total or 50%) for BEVs or FCEVs. BEVs and FCEVs are exempt from the "mass malus".	✕	Taxes on the allocation of vehicles for economic purposes (formerly "TVS"): exemption for BEVs and FCEVs.	As of 1 January 2026, two incentive schemes coexist but cannot be combined. Amounts vary according to the "Certificats d'économie d'énergie" (CEE) market: • The "classic" scheme (from January 2025) provides a purchase incentive ranging from €300 for fully electric cars to €5,000 for fully electric light commercial vehicles, with eligibility extended to both households and legal entities. • The "coup de pouce" scheme targets households exclusively for fully electric car purchases, offering income-based aid of €3,500–5,700. Eligible vehicles must meet minimum environmental standards, cost no more than €47,000, and weigh under 2.4 tonnes. An additional purchase incentive for vehicles with European-manufactured battery cells can reach €1,200–2,000.	Advenir programme: • As of 1 July 2025: financial incentives for independent service stations (not operated by large oil companies or large retail chains): from €1,700–25,000 depending on the charging power. • As of 1 January 2026: new financial incentives for projects with third-party investors, ie entities that finance charging infrastructure without owning the land on which the project is located.
GERMANY				
Accelerated depreciation for new BEVs purchased by companies after 30 June 2025 and before 1 January 2028.	10-year exemption for BEVs and FCEVs registered until 31 December 2030. Exemption granted until 31 December 2035 at the latest. Exemption from the CO2-component of the annual circulation tax for vehicles emitting ≤ 95g CO2/km. More details: www.vda.de.	Reduction of the taxable amount for BEVs and PHEVs (0.5% of the gross catalogue price per month instead of 1%). PHEVs must meet additional requirements, which become more stringent over time. Additional reduction of the taxable amount for BEVs with a gross list price up to €100,000 (0.25% of gross catalogue price per month instead of 1%).	As of 1 January 2026, a socially-targeted, income-based EV purchase subsidy offers up to €6,000 for BEV private buyers. The programme, supporting new vehicle purchases and leasing, applies to households with taxable incomes up to €80,000, with higher subsidies for lower incomes and families.	As of 15 April 2026, funding programme for the development of charging infrastructure in and around multi-family buildings. The subsidy amount per electrified parking space is: • maximum €1,300 without an installed wallbox; • maximum €1,500 with a wallbox; or • maximum €2,000 with a charging point that supports bidirectional charging.

Acquisition	Ownership	Company cars	Purchase	Infrastructure
ROMANIA				
✕	Unique tax of RON 40 (€8) for BEVs. 30% reduction on ownership tax for PHEVs emitting < 50g CO2/km.	✕	Awaiting budget allocation. A new scrappage programme is possible as of Spring 2026.	✕
SLOVAKIA				
Registration fee: • BEV: maximum charge of €33 • PHEV: 50% reduction	Road tax: • Exemption for BEVs • 50% for PHEVs Accelerated depreciation for BEVs and PHEVs from four to two years.	Tax reduction from 1 to 0.5% for the private use of a BEV or PHEV company car. The charging of company cars at home is eligible for corporate expenses.	✕	✕
SLOVENIA				
Minimum registration tax rate (0.5%) for BEVs.	BEVs benefit from full or partial exemptions from the annual vehicle tax, depending on regional implementation.	No benefit-in-kind tax for BEVs.	€7,200 for a new BEV priced up to €35,000 (including VAT). €6,500 for a new BEV priced €35,000–45,000 (including VAT). €4,500 for a new BEV priced €45,000–65,000 (including VAT). €3,000 for a used BEV priced up to €45,000 (including VAT). €2,000 for a used BEV priced €45,000–65,000 (including VAT).	✕
SPAIN				
Exemption from "special tax" for vehicles emitting ≤ 120g CO2/km. In 2026: • BEVs, PHEVs, EREVs, and FCEVs (for private use): personal income tax deduction of 15% of the acquisition cost (without taxes) with a maximum of €3,000. Maximum price of the vehicle: €45,000 (without taxes). • Home infrastructure installation cost: deduction of 15% in personal income tax (maximum €4,000). Canary Islands: VAT exemption for alternatively-powered vehicles (eg BEVs, FCEVs, PHEVs, EREVs, and HEVs) emitting ≤ 110g CO2/km.	Road tax: reduction of 75% for BEVs in main cities (eg Barcelona, Madrid, Valencia, Zaragoza, etc).	The use of a company car for private purposes is regarded as a payment in kind and included in the calculation of personal income tax: • 30% reduction for BEVs and PHEVs ≤ €40,000 • 20% reduction for HEVs ≤ €35,000 Early amortisation for vehicles (BEVs, PHEVs, and FCEVs) and infrastructure investments.	Programa Auto+: • For purchases since 1 January 2026 • Maximum incentives depend on the type of vehicle (BEV or PHEV) and if it is made in the EU: €4,500 (for a car with a maximum price of €45,000)	MOVES Corredores: incentive programme for the installation of publicly accessible charging infrastructure for light electric vehicles along the Trans-European Transport Network (TEN-T). Budget: €200 million. Applications from 30 December 2025 to 10 February 2026. Eligible beneficiaries may include companies providing electric vehicle charging services, both public and private, acting as publicly accessible charging point operators (CPOs) that will hold ownership of the installations. Maximum aid: 70% of the eligible cost. The maximum aid per beneficiary and project is €15 million.

Acquisition	Ownership	Company cars	Purchase	Infrastructure
SWEDEN				
✕	Low annual road tax (SEK 360) for zero-emission vehicles and PHEVs. Higher taxes for new 2025 PHEV models emitting > 75g CO2/km.	The private use of a company car is taxed on benefits. For some cars, there is a permanent tax reduction of the benefit value: • BEVs and FCEVs: SEK 350,000 • PHEVs: SEK 140,000 The taxable benefit value is based on the new car price and reduced by the amount. The discount may not exceed 50% of the car price.	From 18 March 2026, premium to buy or lease a new or used electric car with a maximum price of SEK 450,000: • For households with lower incomes (below 80% of the average income), living in rural areas or areas with poor public transport • Up to SEK 1,300/month (total SEK 46,800/3 years) in addition to a SEK 18,000 starting bonus for households below 50% of the average income More details: Frågor och svar om elbilspremien.	50% tax deduction of the labour and material costs (maximum SEK 50,000) for households installing a charging box at home for an electric car. More details: Grön teknik | Skatteverket. «Ladda bilen» grant for the installation of AC charging for residents in apartment buildings and workplaces. The grant covers up to 50% of costs (maximum SEK 15,000 per charging point). As of 1 February 2026, larger real estate companies and businesses can apply for support for more charging points and higher amounts than before. More details: Ladda bilen. Tax exemption for the benefit of charging at the workplace with the electricity provided by the employer.

EFTA member states and the United Kingdom (2026)

TAX BENEFITS			INCENTIVES	
Acquisition	Ownership	Company cars	Purchase	Infrastructure
ICELAND				
No excise duty on purchase of vehicles powered exclusively by electricity, hydrogen, or methane.	Minimum tax rate for vehicles powered by electricity, hydrogen, or methane (<3.5t): ISK 21,260 (bi-annual). Minimum tax rate for vehicles powered by electricity, hydrogen, or methane (>3.5t): ISK 73,795 (bi-annual).	Private use of company cars is taxed as a benefit. A standard taxable benefit value is calculated and added to the employee's taxable income. The benefit is generally calculated as follows: • 28% of the purchase price per year for petrol, diesel, and hybrid vehicles • 20% of the purchase price per year for electric, hydrogen, and methane vehicles The lower rate provides a tax incentive for low-emission vehicles.	ISK 500,000 for a new BEV costing < ISK 10,000,000 retail price. ISK 400,000 for a used BEV of < 1 year old costing < ISK 10,000,000 retail price.	The Climate and Energy Fund is responsible for the environmental and energy funding which includes campaigns where the application period is limited, and standing advertisement for subsidies related to the power exchange of vehicles.
NORWAY				
VAT (25%) exemption for BEVs of ≤ NOK 300,000 (€25,890). BEVs are exempt from the ordinary one-off tax but pay a weight tax of NOK 12.71 (€0.98) for weights over 500kg.	✕	✕	✕	Some municipalities offer grants to upgrade or install recharging infrastructure to housing associations. Residents in housing associations have a statutory right to set up electric car chargers in their own parking space, or to demand access to chargers in common areas.
SWITZERLAND				
✕	No common national regulation. Some areas (cantons) reduce or exempt traffic tax over a certain period, depending on fuel consumption (CO2/km). Generally, the traffic tax depends on various parameters in different regions. Vehicle performance and weight are of great importance in most areas. Some areas take emissions into account, which favours BEVs, FCEVs, and PHEVs. See also: Motorfahrzeugsteuer or Förderkarte. BEVs are exempt from mineral oil tax or an equivalent tax rate until 2030.	✕	✕	No common national regulation. Various cantons and municipalities contribute to the installation costs of AC charging infrastructure. More details: Förderkarte.

UNITED KINGDOM				
✕	100% First-Year Allowances (FYAs). Businesses can deduct 100% of the cost of qualifying new assets from taxable profits in the year of purchase. FYAs can be claimed in addition to Annual Investment Allowance (AIA), but not on the same expenditure. Eligible assets include electric cars and other zero-emission vehicles (including goods vehicles) and EV chargepoint equipment. More details: Claim capital allowances. Vehicle Excise Duty (VED) first-year rates are CO2 based. Cars with Recommended Retail Price (RRP) over £40,000 pay an additional annual surcharge in VED in years 2-6. For zero-emission cars, this limit is raised to £50,000 (from April 2026).	Preferential tax rates for electric and ultra-low emission cars (< 50g CO2/km). More details: Tax on company cars. Temporary benefit in kind tax easement for PHEVs in the Benefit in Kind system to prevent significant tax charge increases due to new emissions standards. This easement will be in place from 1 January 2025 to 5 April 2028, with PHEVs using a nominal 1g/km rating (rates then vary by EV mileage). More details: Plug-in hybrid electric vehicles – benefits in kind easement.	Some new zero-emission electric cars are eligible for a government Electric Car Grant. Based on environmental performance, there are two possible discounts: £3,750 or £1,500. Grant is included as a discount in the purchase price. To be eligible, the OEM must have science-based target, and the vehicle must be: • M1 passenger vehicle; • emit 0g CO2/km; • minimum battery range of 160km • 3-year or 60,000 mile warranty • powered by a battery with an 8-year or 100,000 mile warranty; • meet minimum sustainability criteria; • base model in range must be < £37,000 and maximum price for eligible vehicle is £42,000. Available until 31 March 2029. More details/eligible models: Electric and hybrid vehicles eligible for a plug-in grant. 35% discount (maximum £2,500) for a converted car to a wheelchair-accessible vehicle. It should: • have zero CO2 emissions; • be able to travel ≥ 112km without any emissions; and • cost < £50,000 (conversion cost not included) Grant available until 5 April 2026. More details: Electric and hybrid vehicles eligible for a plug-in grant: Wheelchair accessible vehicles.	Home Chargepoint Grants (up to £500 per socket). Available to renters, flat owners, and households with private off-street parking or have on-street parking (using a cross-pavement solution). Available until 31 March 2027. Landlord Chargepoint and Infrastructure Grants: landlords can receive up to £500 per socket, and residential infrastructure funding of up to £30,000 per property, covering sockets and future-ready parking spaces. Available until 31 March 2027. Education Establishments – Workplace Charging Scheme: State-funded schools and education institutions can receive up to £2,000 per chargepoint socket, with funding available for up to 40 sockets across all sites. Available until 31 March 2027. Workplace and Organisation Chargepoint Grants: up to £500 per socket. Available to businesses, charities, public sector organisations, with funding up to 40 sockets across sites. Available until 31 March 2027. Small and medium-sized businesses can receive infrastructure funding of up to £15,000 per property for chargepoints and future-ready parking. Available until 31 March 2026. More details: Electric vehicle chargepoint grants.
